MODEL TLP-96111/A/SM

Ordering: P/N 61961111400  Termination: Flying Leads

TECHNICAL DATA
(Typical values @+25ºC for batteries stored for one year or less)

- Capacity to 3.0V (@0.5A @1% duty cycle)  1.2 Ah
- Nominal voltage  3.6 V
- Maximum 1 second pulse to 3.0V  3 A
- Maximum pulse length @0.5A to 2.8V  1000 sec
- Delay time to 3.0V @0.5A  No Delay
- Weight  45 gr
- Operating temperature range  -40ºC to +85ºC
- Capacity retention after 10 years  78%

• HIGH ENERGY
• UP TO 3A PULSE CAPABILITY
• INSTANT VOLTAGE RESPONSE
• NO PASSIVATION EFFECT

For High Pulse Current Applications

Rev. C Dec/04
MODEL TLP-96111/A/SM

The battery is designed specifically for applications requiring low background currents combined with high current pulses. The Pulses Plus™ battery combines the inherent benefits of bobbin type Lithium Thionyl Chloride cell with a novel hermetically sealed Hybrid Layer Capacitor (HLC). The addition of the HLC enhances the performance of the Lithium Thionyl Chloride cell to meet large pulse current requirements, thus providing greater performance and safety in comparison to jellyroll construction (spirally wound) type batteries.

* The PTC is optional and not necessary in many cases.
